DIAMOND STAMPING WAX.

This is the cleanest and most economical way for the transfer of stamping patterns to any kind of material, including wood and leather. No hot iron required to set it; makes a very clear impression that does not rub when working. Made in white, black, blue and red.

Put up in large cakes, with directions for using, at 25c per cake.

STAMPING POWDER.

Most stampers now use wax. A few will need the powder in some cases, if they have letters on hand made for powder stamping; as liquid stamping is done with smooth side of pattern up, with powder the reverse.

Colors, white and blue, in box with felt top distributor, 15c each, 2 for 25c.

COLORED TRACING PAPER.

A very great help to the needle-worker. With it she can trace any design out of the newspapers onto any kind of material. The colors will all wash out. This is an extra stout well coated paper; consequently many tracings can be made with one sheet. Although it traces readily, the colors will not follow the floss when working.

Directions—Lay a piece of impression paper, face down, upon the material, place newspaper print or other pattern to be transferred, over this; with not too sharp a pencil trace each line quite firmly.

We have the following colors in stock: white, black, purple, red and blue. Size of sheet is 15x20 in. Price is 15c per sheet.

We also have the blue carbon paper in size 26x39, price 25c per sheet.
