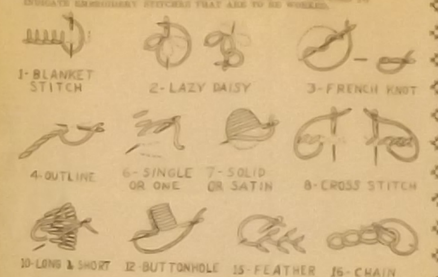
EMBROIDERY STITCHES

THROUGHOUT THIS FOLDER THE FOLLOWING NUMBERS ARE USED TO INDICATE EMBROIDERY STITCHES THAT ARE TO BE WORKED.



CROSS STITCH

Be sure that the top stitches of all crosses slant in the same direction and that each cross touches the next one in it.

APPLIQUE

Some patterns in these assembly is numbers and letters may then be appliqued to material by stitching down, turning under a narrow hem around. Patches must be OUTLINED—BLANKET STITCHED—or—BUTTONHOLED.

CUTWORK INSTRUCTIONS

Punched cutwork gives a much better appearance to your work. Work two rows of stitch (4) inside border lines of design. Do not cut these threads until work is finished. When one stitching is completed cover the design with a piece of paper (12). Work each stitch either to the next one with the beveled edge towards the paper. Be sure to work from right to left if you are right handed and vice versa if you are left handed. This can be done on the right or wrong side of work, cutting as close to the border lines as possible.

QUILTING

Be sure that all embroidery is completed first. For best results use the lining for quilt, lamp-shades or frames, and use the same kind of cotton wadding between. When quilt according to manufacturer's or accepted standards with a fine cotton stitch or quilting stitch. Use a strong quilting thread. Be sure that quilt is not stretched up through frame so that it forms the design on the wrong side, too.
