

DIRECTIONS FOR STAMPED QUILT NO. 7026

Best applique work is done by turning under and basting allowed seams on applique pieces. Press with an iron. Pin or baste in place on background material, and sew down with fine hemming stitch. Do not turn under edges of applique parts where another applique part overlaps.

Trace and cut out the required number of applique parts indicated on pattern sheet.

Place applique parts on corresponding parts of background material, following above directions for applique.

NOTE: Before basting handle and basket to background, cut openings in these motifs as indicated by short lines.

Use outline stitch on lines in leaves, and outline petals of flowers with same stitch.

Applique small scallops onto background border.
