

WASHINGTON MERRY-GO-ROUND

Suggested colors: Light and dark pink, a pretty, soft print with pink predominating and a pastel shade of green. **Material required:** 3½ yards of white, 5½ yards of light pink, 1½ yards of print, 1½ yards of green and ¼ yard of dark pink. This makes a quilt 84 x 108 inches. By leaving off a block each way, you can easily make it 72 x 96 inches.

This little applique of white and circles is quite easy to make if you follow these simple directions: There are 32 applied blocks and 11 plain blocks (9 blocks long and 7 blocks wide), set together checkerboard-fashion, with a strip of light pink, broken at the corner of each large block by a small piece of square of print and green. These strips are 2½ x 5½ inches, allowing ¼ inch for seam. The white block is cut 4½ inches square, allowing for ¼-inch seam on all four sides.

The following method is used to make this applique: Trace patterns on strong, stiff kraft paper; cut carefully and then use to draw around on to the wrong side of cloth. These patterns do not allow for seams; so cut a seam larger and, with paper patterns still placed in wrong side of cloth, turn the edges smoothly over the pattern with a hot iron. The line of pressing will be flat, which will enable you to sew the patch in place with ease.

Now we are ready to assemble the patches on the 9½-inch squares. Fold each square diagonally both ways and crease well. This locates the center as well as the position of each straight edge of the white, and the imaginary center line of the leaf falls on this creased line also. First locate your large dark pink circle on square and pin in place; over this, pin the small circle of print; next your white (with only the straight edge and outer curve turned under); slip the inner curved edge under the large circle up to the pencil line, placing the straight edge on one of the diagonal folds. There are two white of print and two white of light pink. The green leaves are slipped into place. Handle all carefully and sew without "puckering."
