HOROSCOPE QUILT—PATTERN NO. 22

self-reliant
hopeful
logical
enduring
(CAPRICORN)

By EDITH B. CRUMB.

CAPRICORN people are not very happy folk. At least that is what the ancients found. They were always afraid, said the ancients, that they were being made into goats. They whined about the situations in which they found themselves. They put themselves into trouble because they interfered in other people's affairs.

But after one has said those un-

pleasant things about them then one can find plenty of pleasant characteristics.

They are self-reliant, hopeful, logical and enduring in their friendships. They possess the quality of sticking with a project. Some years ago it was thought that Capricorn people were eccentric in their investments, but the last two years have made us feel that we were all exceedingly eccentric. Why we ever invested in some of the stocks we did is still a mystery so we can't

invest the Capricorn people only with that peculiarity.

The Capricorn people make good teachers and leaders of masses of people.

When they have developed themselves to their highest they have concentration, and are adaptable and patient.

So, if you are a Capricorn person you really are very nice and aren't you glad you were born under that sign?
