HOROSCOPE QUILT—PATTERN NO. 25

HERE we are with the last of the signs of the zodiac. It belongs to those people who are born between the dates Feb. 20 and March 21. We have gone clear around the year and back to the folks who are born in the spring of the year.

But before we reach the Aries people again we will consider these folks called Pisces.

Since the only part of the human

figure which is left for the last sign is the foot and since the human has two of these, we may expect—according to all the rules thus far—to have the sign of the zodiac express that dual nature. His conventionalized symbol shows the two joined but each one going somewhat its own way.

That means that the person has to watch himself. He never will make a martyr for he always can

see both sides of a question.

These people, like the Gemini folks need to remember that it is never wise to swap horses when crossing the stream. They need too, to recall the homely saying that "a bird in the hand is worth two in the bush." They find it hard to be content with seeing just one side of a question. Their fairness makes them see the other person's point of view as well.
