## LAUREL WREATH QUILT—LEAFLET NO. 20.

**N**OW, here is an easy flower to make and it is so effective with its three points peeking around the edge of the larger three petaled piece. This is somewhat simplified for by rights there should be three separate petals in the large part of the flower. If any of you are anxious to do a specially nice piece of work you can subdivide it. This will be applied to a 12½ inch by 12½ inch square. A light lavender is a good choice of color for this flower, and the center may be a light green. Now you have three finished blocks for the fourth row which means that you have only seven more to be done.
