### Garden Center to Show Movie

THE DETROIT GARDEN CENTER will sponsor a showing of "Spring Bulb Garden," a colored motion picture, Wednesday at 2:45 o'clock in the afternoon in the lecture hall of the Art Institute.

Mrs. Horace B. Peabody, president of the Center, will talk briefly on the use of tulips in the garden picture.

## Quilter Designs Pattern To Use Up Small Scraps

By EDITH B. CRUMB

WHEN Mrs. Anna Zumbro, 3823 Beniteau avenue, looked through a package of odds and ends of quilt materials she found so many of one shape that she decided to design a pattern around this.

She thought at first it would be a simple matter, but before she was through she had spent almost six hours on it. The pieces, as you will notice from the picture, are little wedges with one curved and two straight sides.

#### PIN WHEEL

Mrs. Zumbro worked these into a design which she calls the Pin Wheel. To cover up some of the irregularities of the lower part of the wedges a circular piece was applied in the center.

You may think, at first glance, that this is an easy pattern to make because those wedges are just applied like the Dahlia pattern; but that is where you will be wrong, for they are pieced and this means that there is only one thickness of the top through which to quilt. That is why it was so difficult to get the pattern worked out.

IF YOU want to see what may be done with odd shaped pieces of material — pieces you might throw away because you could not see any possibilities for quilting in them—look for Mrs. Zumbro's quilt top at the big show which is to be held May 24, 25 and 26 at the United States Naval Armory. I don't think she will have time to quilt it, but it

will be interesting just to see the top this year.

#### SENDS COUPONS

She had another quilt top with her when she came to the Corner meeting last week. It was what she called a Gypsy quilt and was made up of all colors and designs of materials in diamond shaped pieces. This is very gay and she is making it for her son. The back
