Child Study Association,

DLEASE give me your opinion on this situation. We have two daughters, 10 and 12 years old, respectively. Each has a girl friend of her own age. Lately four boys have been coming to our house after school and in the evening. They ro home about 8:30. They play all sorts of games, listen to the radio and practice dancing. The father of a girl in the group thinks that boys of this age should not be play-ing with girls. One of the mothers

also asked me if I thought it was suitable. The children are not on the street, they are inside, usually in a basement room. I am with them a good deal. The question is, is it all right for boys and girls of this age to play together so much?

In theory it doesn't make any difference at what ages boys and girls play together. It is true, though, that the play of boys and girls of this age and of younger children should be supervised. So far as the association with one another is concerned there is no question but that friendships of this type are of value in that they allow children to come in contact with different attitudes and new ideas.

These boys and girls are going to be men and women in a few years and this social background will be of considerable help to them in choosing a mate who will remain congenial. It is a mistake to think that boys should play with boys and girls with girls during their pre-adolescent years but compan-
