

You'll Love to Make These Gay Boxes at Home

Here is Beatrice of the Quilt Club Corner, forgetting all about quilts for a little while. With an assortment of wallpapers, some great big shears and a lot of paste, it won't take her long to make boxes that will lend an air of distinction to those gifts that she isn't telling anybody about.

Work That's Lots of Fun and Is Very Easily Done

By EDITH R. CRUMB.

HAVE a heart, ladies! Don't toss a neat good, substantial box into the trash pile because there seems nothing else to do with it. "Wallpaper Accessories," has been prepared on the making of boxes by the Beauty in the Home Editor. New decorative effects and color schemes are given. When sending for a copy

tables and radio are walnut. Also, can you suggest draperies that could be used with slip covers on furniture and when not using slip covers I prefer damask. My davenport and chair are dark green with reversible cushions, while lounge chair is rust but not a red, red rust. If not, please suggest color for damask draperies to be used without slip covers and color and material of draperies, to be used with slip cov-

ers.
