## THE BIBLE QUILT

One of the most famous quiltmakers of the 1940s & '50s was Bertha Stenge of Chicago. A multi-prizewinner in many big quilt contests of that period, her intricate applique quilts with elaborate quilting designs were an inspiration to many. At Mrs Stenge's death in 1957, her quilts were inherited by her three daughters. The quilts belonging to Francis Traynor, the oldest daughter, have remained in her possession. One daughter subsequently died and left her share of the quilts to her three daughters. The youngest daughter, Prudence Fuchsman offered her quilts for sale in 1971. The CHICAGO TRIBUNE of April 5, 1971 ran an announcement of the sale and a full page color picture of the "Bible Quilt" in the

"Feminique" section with the caption, "The lighthearted feeling evoked by this handstitched quilt almost belies the expert, sophisticated craftsmanship with which it was executed. Its creator, the late Bertha Stenge was considered an authority in quiltmaking ... Here, she depicted 12 scenes from the Bible in charming detail,

using as background antique white moire and ice blue skinner satin." For many years historians took "creator" to mean designer. In 1979, a letter dated Apr 2, 1953 came to light from Charlotte Johnson of LADIES HOME JOURNAL staff in reply to Bertha Stenge's query as to the designer of the "Bible Quilt"\*. Miss Johnson replied, "I have not been able to find the name of the girl who designed our "Bible Quilt" \*\*. I finally located her last name but cannot remember or find her first name. And so I think the 'credit' will have to be 'Miss Jervis'". Most of Mrs Stenge's quilts remain in the family and are rarely seen. Mrs Traynor and Mrs Fuchsman loaned quilts for the 1979 Patch in Time exhibit in San Francisco and Mrs Fuchsman's quilts were exhibited at the Land o' Lincoln Quilt Symposium.

From DIARY OF A BOSTON SCHOOL GIRL, written by Anna Green Winslow, edited by Alice Earle, Cambridge- Houghton, Mifflin Go, 1894, pg 62.

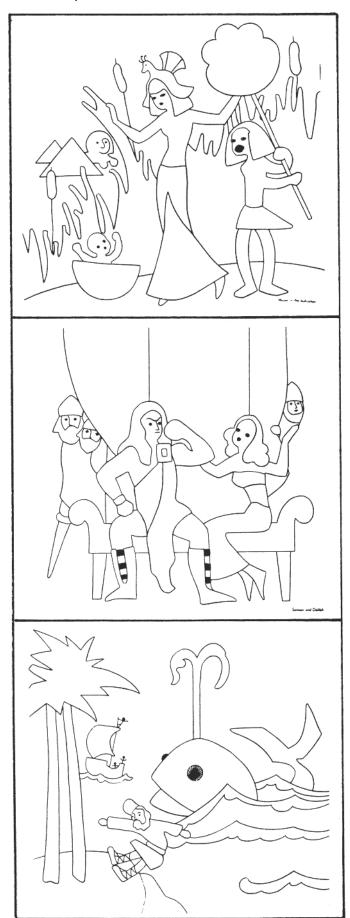

"April 18th (1772) - Some time since I exchang'd a piece of patchwork, which had been wrought in my leisure intervals, with Miss Peggy Phillips, my schoolmate, for a pair of curious lace mitts with blue flaps which I shall send, with a yard of white ribbin edg'd with green to Miss Nancy Macky for a present. I had intended that the patchwork should have grown large enough to have cover'd a bed when that same live stock which you wrote me about some time since, should be increas'd to that portion

you intend to bestow upon me, should a certain event take place."

Anna Green Winslow was twelve years old when she wrote this, and was living in Boston with an aunt in order to get an education. Her parents lived in Nova Scotia.

My interpretation is: Anna Winslow was making some sort of applique (That's what "patchwork" meant in the 18th century). This diary entry is a copy of a letter to her mother, and Anna is telling her that she had originally hoped to make a complete quilt top, and to later quilt it with a wool batt from the livestock" her mother had promised her when "a certain event" (Anna's engagement or marriage) came about.

## **COLOR AND FABRIC SUGGESTIONS**

FOR BIBLE QUILT No. 1503

## ISSUED BY THE MAKE-IT-YOURSELF DEPARTMENT - LADIES HOME JOURNAL

WITH all the tiny pieces that go into the stories, this patchwork quilt is not easy to make, as you can see, but when it is finished, you will have an heirloom your little girl can give her little girl! Before you begin cutting your material, write in the color notations on this sheet so that you will have a working guide. Better still, cut a snip of the fabrics and lay in their places, then you will have a better idea of the whole color scheme. Trace off the outlines of the pieces, so that you can keep the diagram chart. If you prefer to do all the cutting out at one time, have a large envelope for each story square.

The background squares are 12" by 11 1/2", and allow for a 1/4" hem. If you use only the story squares, 3 squares wide, with a 3-inch border top and bottom, the quilt will be 42" by 52"; but alternating the story squares, with a plain square, the quilt will be 48" by 69".

Use plain color chambray-ivory, pale grey-blue or light beige for large squares. The background should be neutral, to make an effective color scheme. The original quilt was worked on grey cotton. Sew down the pieces, turning under a 1/8" hem with an over-and-over stitch, and embroider details as directed. Work eyes in black or blue satin stitch, features in black with running stitch, and mouths in red satin stitch, with mercerized embroidery cotton. Join squares, sew on the border, line with quilt lining or cotton batting and face.

LUCY HILTY - cont from back cover

On the picture of the Queen of Sheba coming into the court of Solomon, I was able to quilt pillars to show she was arriving at the palace.

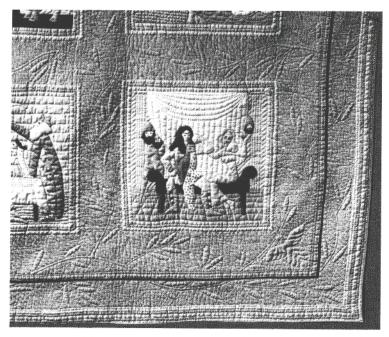

That part was fun for me!

It was also on this quilt that I really explored what it does to put in your fill-in background... How different it becomes and I finally got background fill-in quilt-ing settled in my mind.

I have put a lot of olive branches in my sashing. Before I did the olive branches I brought home pieces of olive branches and put them in a vase in the window to study. Olive trees are kind of a funny, stubbly, desert like tree with branches sticking out from the main stem. It was very interesting to observe the branches and adapt them to the quilt.

The quilt has been important to me - I mean I enjoyed taking it with me so I could explain to people what I was trying to do and then being able to show them how to get different effects with the quilting.

Lucy Hilty quilts on either a hoop or on a big frame, depending on the project. Here she is seen using her hoop while quilting "Jonah & the Whale" on the Bible quilt. Another article about Miss Hilty is on pg 9.

## LUCY HILTY & THE BIBLE QUILT

as told by Lucille Hilty in a taped interview 2/9/83 with Joyce Gross

The Bible Quilt has been around since about 1977 when my friend Margaret Grosse asked me to finish a quilt from the blocks her mother, Alice Stone, had made in the 40s.

Fortunately, Margaret was not in a hurry for the quilt so I have been allowed to experiment with it and explore a lot of different ways of quilting. Because I have been allowed to experiment, the quilt has evolved and become more interesting. Because I had the time, I was able to go back to the Bible and read the story for the settings so I could quilt the background of the patches, e.g., the story of David and Goliath. It took place in the vale of Hebron. I decided that I could show that it was a valley by quilting some mountains in the background and making the mountains come together as though they were coming down into the valley.

In the case of the handwriting on the wall during the Babylonian captivity, I went back and read about their culture and found they had really magnificent buildings made basically with adobe. The adobe was made of a brick-clay mixed with organic material. I couldn't show this on the quilt but I learned they had beautiful walls in their palaces so I did a tile-like floor in that picture.
