# A Heritage

## of the Past

THE women of the colonial days are responsible for the great advancement in the Art of Quilt Making. Each new design was greeted with a chorus of enthusiastic approval, and gifted hands fell busily to work completing it.

To them a new pattern was the most exciting discovery of the month; a completed quilt the proudest achievement of a year. The gay happenings and bits of gossip were recounted at the Quilting Bees, and to the pioneer woman at the outpost of civilization it gave solace during those strenuous days, and warm comfort against the winter's blast at night.

The designs assembled on the pages of this book are heritages of the past. And just as they contributed to the feminine contentment in by-gone generations, today's modern women are finding even greater pleasure in recreating these lovely designs with their own hands.

More quilts are being made today than ever before. The patterns assembled in this book have been selected for their popularity. Each pattern is accurate, contains a cutting guide for each piece and has seams allowed, suggested color schemes and other information, assuring you an authentic Early American Quilt with which to make your bedroom lovely, too.

*I love the new revival  
Of this old, simple art,  
So feminine—appealing  
To every woman's heart:*

*The bits of bright cloth glowing,  
A scissors' glinting gleam,  
The cut squares and diamonds,  
A deftly needled seam—*

*A woman's face above them,  
Her cheeks and eyes aglow,  
This daughter of the mothers  
Who pieced quilts long ago,*

*To make their bedrooms lovely,  
And gay and sweet and bright:  
More cheerful in the daytime,  
More colorful at night.*

*She sews the bits together,  
And, intricate or plain,  
Beneath her flying fingers  
Grows basket, star or chain.*

*All breathlessly she places  
The bright blocks in a line,  
And watches them completing  
Some beautiful design.*

*And views the finished pattern,  
A thing of light and grace,  
To make her home a sweeter  
And more attractive place.*

# The Pendulum Swings Back a Hundred Years. Again the Quilt Dominates the Bedroom

Decorations and modern **decorators whether furnishing** bedrooms with old or new pieces choose patchwork quilts not merely as bed coverings **but** as keynotes for bedroom decoration.

The following materials are recommended to you as the most suitable for making your quilts:

Muslin of firm weave, free from dressing or filling, old-fashioned oiled calico, for the small all-over print effects that reproduces the true early American effects so much desired.

Sateens, either domestic or French qualities, are suggested as **they offer you a rich** lustrous material that can be had in four contrasting shades.

Fine gingham and percales for setting quilts together, in vat-dyed colors, can be had in any of the pastel shades. Vat-dyed prints in an endless variety of **colors and** combinations can be used most effectively when combined with solid colors. Some quilt makers prefer to use **81** or **90-inch** muslin for the back as it has no seams.

Waxed finished or special quilting threads are coming into popularity, as they do not kink, and they work through the cotton easier.

Cut materials accurately, fold in seams evenly, and when sewing materials together, have one edge on the straight of the material joined to a bias edge. Avoid sewing two bias seams together.
